Research, Internship, Training, & Employment

1. Social Networking Experiment

Hello,

My name is Betty Wan and I am a sophomore Communication major. I got your email from the Cornell Society of Women Engineers RSO listing.

I am interested in starting a social networking experiment using online wish lists and products from ecommerce websites. I want to design a website interface where people can interact online by sharing, commenting on, giving, and receiving presents. I am looking for someone who has a computer science background who would be interested in working on this project with me by developing the website. I am hoping that, if

interested, this project can be done to receive class credit or eventually turn into a sort of entrepreneurial endeavor.

Thank you,
Betty Wan

2. Raytheon – Integrated Defense Systems is HIRING!

Raytheon - Integrated Defense Systems

Raytheon is hiring engineers in the Boston metro area. ECE, ME, and CS majors are in high demand. Search for positions at www.rayjobs.com. Many job openings are for Systems Engineers, so be sure to include that in the search fields. Systems engineering combines electrical engineering, mechanical engineering, computer science, and physics to design, integrate and test complex engineering systems. US citizenship is required.

Misc.

3. Competition and Collaboration Survey!

Hi Cornell Engineering Student,

We are seeking your thoughts on collaboration and competition within the College of Engineering. Often students are encouraged by professors to work together in groups on projects or certain class work, and other times professors explicitly prohibit such behavior. Please take a few minutes to complete our survey and give us your opinion on the matter. This should take you no longer than 3-5 minutes. We greatly appreciate your help.

4. Bernales & Goretti Designer Sale

Hi, my name is Constanza and I am a senior Apparel Design major. I started my own fair-trade brand three years ago. I now have many amazing products (dresses, purses, jewelry, skirts, blazers, tops, etc) here with me at Cornell that I think would look fabulous on you or someone you may know. I wish to dedicate myself to this endeavor upon graduation and am looking to raise some money by selling products from my previous boutique.

The prices range from 15 to 100 dollars. Everything is made in Peru by well-paid workers and we use no animal products. Please check out my new brand's page on Facebook: */Bernales & Goretti/*, where you will be able to read a lot of press about my business partner Angeline Stuma, and view our products. If you are interested please contact me at this email of through Facebook. I am available to give you a personal consultation and product viewing at your convenience. If I may humbly request that you forward this email to your list-serve, I would be eternally grateful.

Thank you,
Constanza Ontaneda
