Events

1. CU SOAR presents: New Frontiers in Environmental Research and Sustainability

*Undergrad Research Symposium: A three-part speaker series about today's medical, nanotech, and environmental science.

[Through Pathways to Success last semester, we exposed you to the careers, struggles, and highlights of both budding and established researchers. Now, get a look at the world of research from a large-scale perspective! CU SOAR presents a three-part event series that will bring you insight to the most cutting-edge fields of research: nanotechnology, medical science, and environmental sustainability. Our speakers will present their

discoveries, share their research's application to the real world, and offer advice about the future of their fields in today's global dynamic. Please see below for event details! Don't miss out on this exciting opportunity to meet representatives of fascinating areas of work and hear them speak!]

*****NOW, we invite you to the third of three events*****

WEDNESDAY, APRIL 22 at 5PM
KAUFMAN AUDITORIUM, GOLDWIN SMITH HALL

Professor Ruth Richardson of the Civil and Environmental Engineering department will discuss new frontiers in environmental research and sustainability.

Research, Internship, Training, & Employment

2. Social Networking Experiment

Hello,

My name is Betty Wan and I am a sophomore Communication major. I got your email from the Cornell Society of Women Engineers RSO listing.

I am interested in starting a social networking experiment using online wish lists and products from ecommerce websites. I want to design a website interface where people can interact online by sharing, commenting on, giving, and receiving presents. I am looking for someone who has a computer science background who would be interested in working on this project with me by developing the website. I am hoping that, if interested, this project can be done to receive class credit or eventually turn into a sort of entrepreneurial endeavor.

Thank you,
Betty Wan

Scholarship Opportunities

3. AfterCollege Scholarship Opportunities!

Dear SWE Members,

AfterCollege hosts a customized website for the SWE chapter where you can access entry level jobs, internships and scholarship information specifically for Cornell SWE students. This resource is updated daily with new positions and information. To access this information, click here: <http://www.aftercollege.com/group/1015867297/>

Thank you, and good luck with your job search!

Cheers,
The AfterCollege Team
