1. **About the event** – Please describe the event briefly. Was the turn out what you expected and/or wanted?

We put on a gak-making event at the Sciencenter. There was a brief introduction prior to the event explaining SWE and engineering. We also gave a simple explanation of the science behind gak. The turnout was good, but we expected a little more to come. There were probably ~40 or so kids that made gak. It was a 2 hour event, but we need extra time for travel, clean-up, and set-up.

*****PLEASE TURN OVER AND FILL OUT THE BACK *****

2. **Specific Problems** – Please list any problems that were encountered in the organization and execution of the event.

Everything worked our well.

3. **Suggestions** – Please elaborate on ways in which SWE can improve this event for next year. Include general suggestions and advice for the future.

If possible have the event more in the winter season, that way more kids will be there. We did the event on a rather nice day and there were not that many kids at the Sciencenter.

4. **Budget-** Please make a budget of things purchased for this activity and their prices.
